GENERATION MINING

Building Canada's Next Critical Minerals Mine

September 2025

FORWARD-LOOKING STATEMENT

This presentation contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as "forward-looking statements"). Forward-looking statements reflect current expectations or beliefs regarding future events or the Company's future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "continues", "forecasts", "projects", "predicts", "intends", "anticipates", "targets" or "believes", or variations of, or the negatives of, such words and phrases or state that certain actions, events or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved, including statements relating to the Company's Technical Report (as defined below) and results therefrom, mineral resource and reserve estimates, the timing of permitting and construction, the availability of sufficient financing to commence construction and the timing of such financing, proposed mine production plans, projected mining and process recovery rates (including mining dilution), estimates related to closure costs and requirements, metal prices (including the effects of supply demand imbalances on the metals the Company intends to produce) and other economic assumptions (including currency exchange rates), projected capital and operating costs, and AISC, financial or economic analysis estimates (including cash flow forecasts, NPVs, IRRs and payback periods), and mine life.

Although the Company believes that the expectations expressed in such statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the statements. There are certain factors that could cause actual results to differ materially from those in the forward-looking information. These include commodity price volatility, continued availability of capital and financing, uncertainties involved in interpreting geological data, increases in costs, environmental compliance and changes in environmental legislation and regulation, the Company's relationships with First Nations communities, exploration successes, and general economic, market or business conditions, as well as those risk factors set out in the Company's annual information form, the Technical Report that the Company filed in connection with the Feasibility Study Update and in the continuous disclosure documents filed by the Company on SEDAR at www.sedarplus.ca. Readers are cautioned that the foregoing list of factors is not exhaustive of the factors that may affect forward-looking statements. Accordingly, readers should not place undue reliance on forward-looking statements. The forward-looking statements in this presentation speak only as of the date of this presentation or as of the date or dates specified in such statements.

Forward-looking statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions relating to: the availability of financing for the Company's operations; operating and capital costs; results of operations; the mine development and production schedule and related costs; the supply and demand for, and the level and volatility of commodity prices; timing of the receipt of regulatory and governmental approvals for development projects and other operations; the accuracy of mineral reserve and resource estimates, production estimates and capital and operating cost estimates; and general business and economic conditions.

Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking information. For more information on the Company, investors are encouraged to review the Company's public filings on SEDAR at www.sedarplus.ca. The Company disclaims any intention or obligation to update or revise any forward- looking information, whether as a result of new information, future events or otherwise, other than as required by law.

Technical Information

The scientific and technical information contained in Appendix D of this presentation was reviewed and approved by Matthew Pitts, P.Geo., Exploration Manager of Generation PGM Inc. ("**Gen PGM**"), a wholly-owned subsidiary of Generation Mining Limited ("**Company**"). All other scientific and technical information in this presentation was reviewed and approved by Daniel Janusauskas, P.Eng., Technical Services Manager of Gen PGM. Each is a "Qualified Person" as defined under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects*. For further information see the Technical Report entitled "Marathon Copper-Palladium Project - Feasibility Study Report Update", dated March 28, 2025, with an effective date of November 1, 2024, and filed under the Company's profile on www.sedarplus.ca or on the Company's website at https://genmining.com/projects/feasibility-study/ (the "**Technical Report**").

VALUE PROPOSITION:
WHY GENERATION MINING

GENERATIONMINING

TSX:GENM OTCQB: GENMF

- Tier 1 Jurisdiction in Northwestern Ontario, Canada
- Shovel ready with all necessary permits required for construction are approved
- Recently updated feasibility study (March 2025) with improved CAPEX and OPEX
- Trading at a substantial discount to its peers
- Strong support from local Indigenous communities, the town of Marathon, Provincial and Federal governments

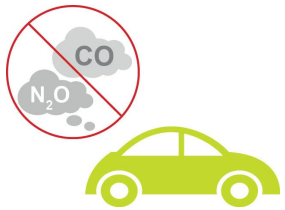
METALS FOR THE ENERGY TRANSITION

GENERATIONMINING
TSX:GENM OTCQB: GENMF

PALLADIUM

4 million oz#

168,000 oz/yr*

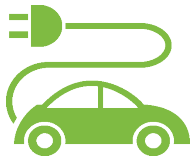


Palladium is used to **scrub nitrous oxide from gasoline exhaust.** Nitrous oxide is 300X more potent than CO_2 as a greenhouse gas.
Annual palladium produced will supply ~ 735,000 cars.

COPPER

1.1 billion lbs#

42 million lbs/yr*



An electric car needs about 180 lbs of copper, more than four times that of a gasoline-powered vehicle. Annual copper produced will supply ~ 225,000 cars per year.

PLATINUM

1.3 million oz#

38,000 oz/yr*

Hydrogen Fuel Cells need 1-2 ounces of platinum per vehicle. More is needed in the manufacture of hydrogen fuel.

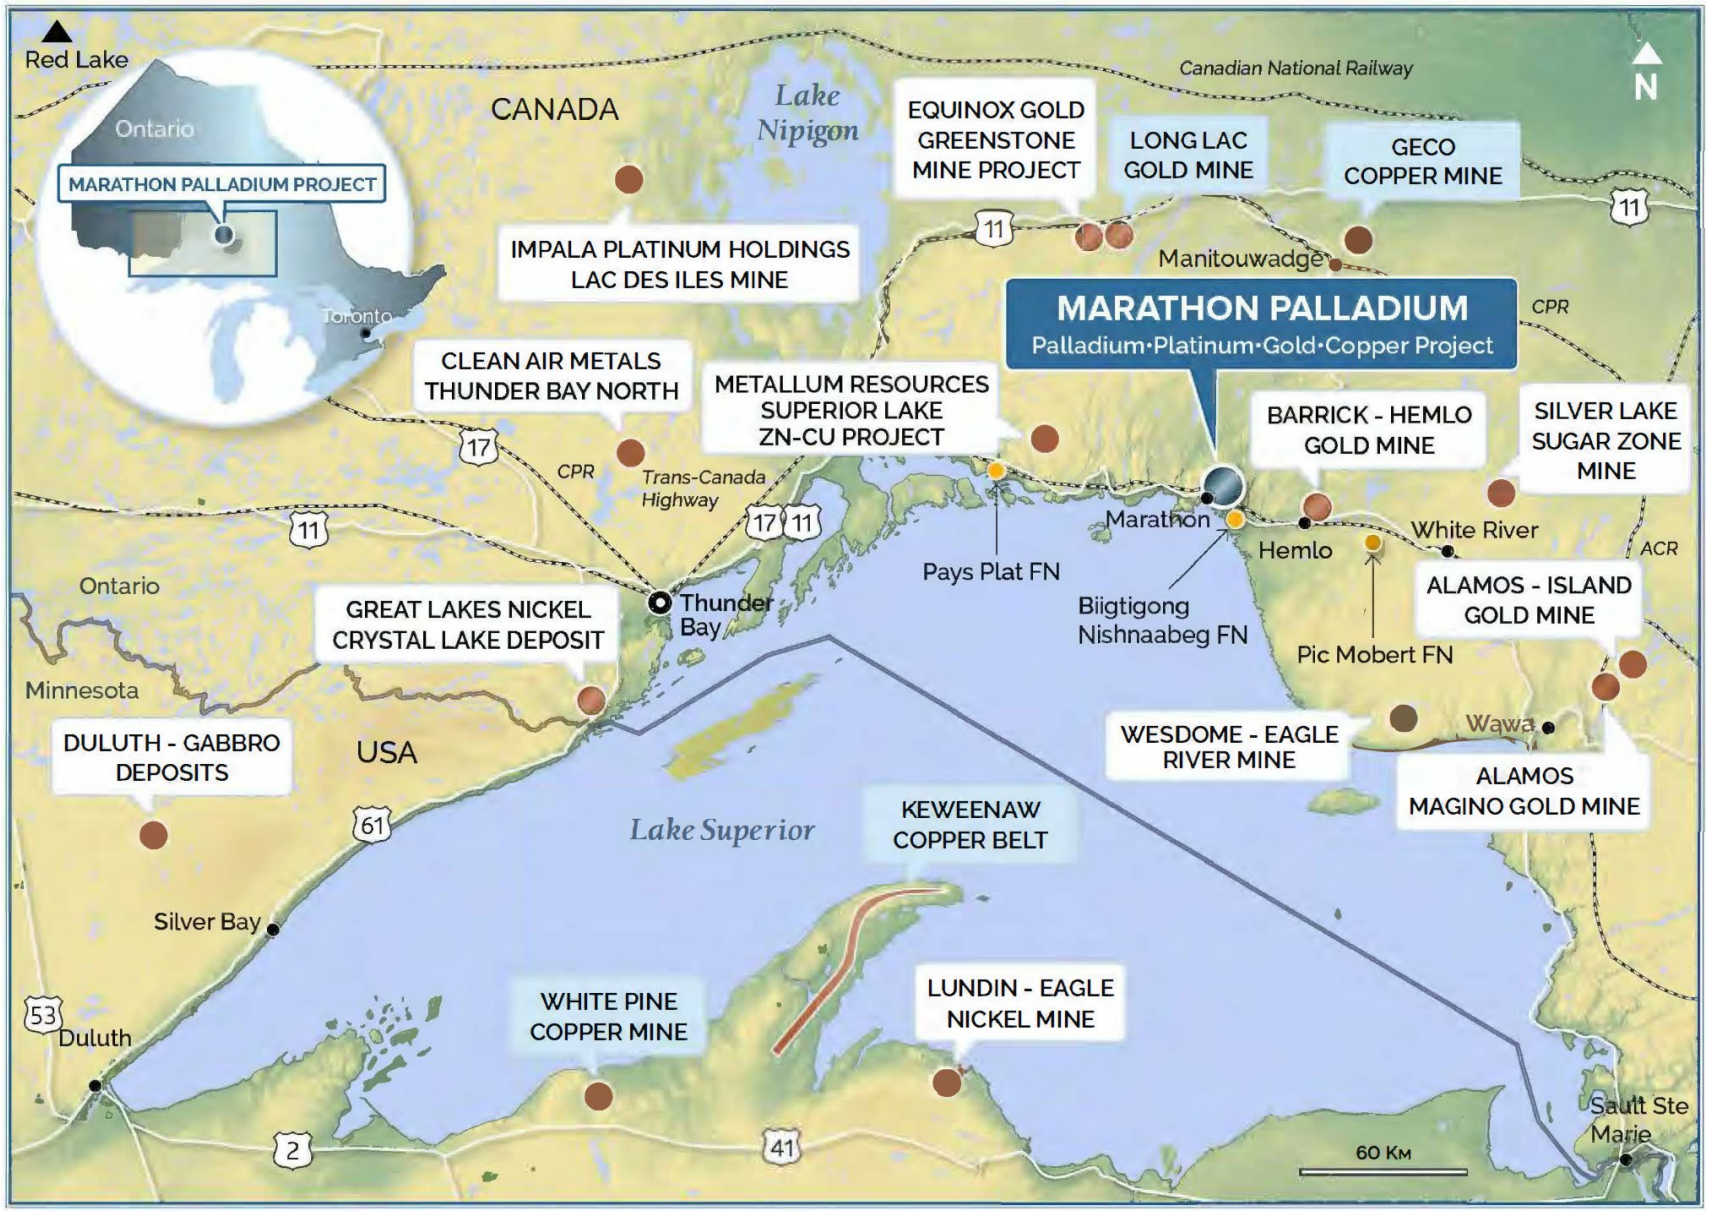
Total Measured and Indicated Mineral Resource estimates. For additional information relating to the Measured and Indicated Mineral Resources contained in the Marathon, Sally and Geordie deposits, including categories, quantities and grades, see Appendix A at the end of this presentation.

*Average annual payable metal estimates for the Marathon deposit. For additional information see Sections 16 and 22.2 in the Feasibility Study at https://genmining.com/projects/feasibility-study/.

HISTORIC LOCATION IN ONTARIO

GENERATIONMINING

TSX:GENM OTCQB: GENMF



CANADA'S NEXT CRITICAL MINERALS MINE
TEIR 1 JURISDICTION: NORTHERN ONTARIO

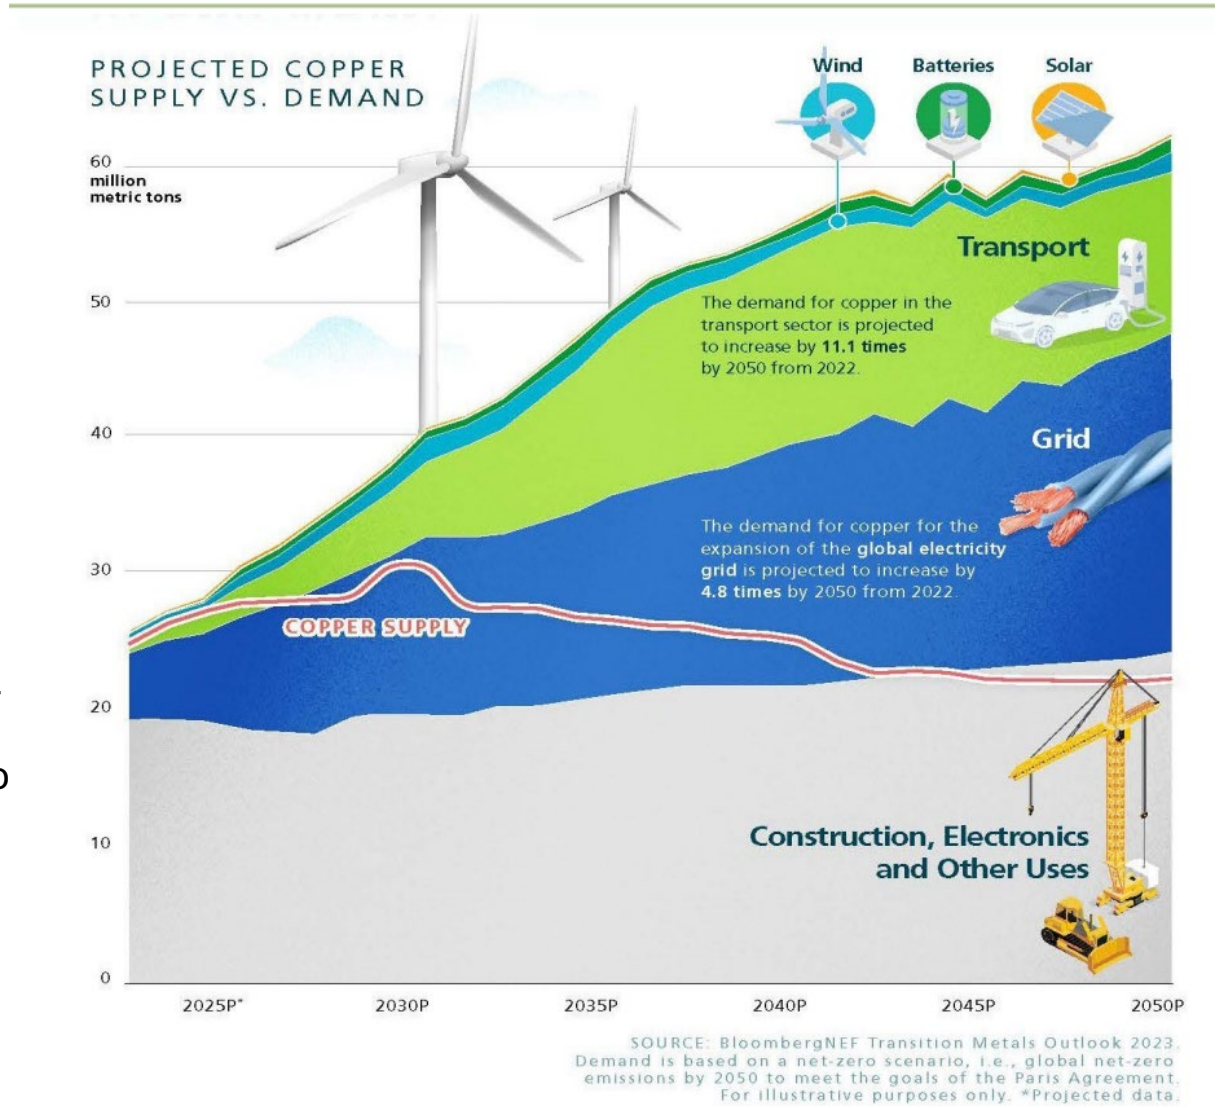
GENERATIONMINING

TSX:GENM OTCQB: GENMF

- Located on **Trans-Canada Highway**
- Served by **CPR main rail line**
- The property is next to **Marathon Airport**
- Main Marathon deposit is 10 km from **Town of Marathon** (~3,000 pop.)
- **New 230kV power line** from Wawa to Thunder Bay crosses property
- Low **carbon grid** power (primarily nuclear)
- 276 Bed Construction Camp (Option to own) in the Town
- Numerous towns, Indigenous communities **nearby** available for the **core** workforce

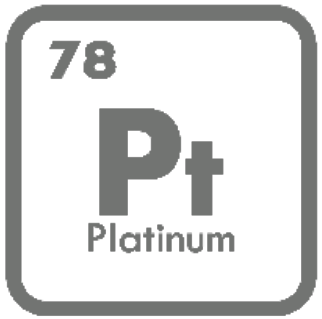
WHY IS COPPER IMPORTANT
FOR THE FUTURE

- Copper is **fundamental to the energy transition** because it is essential for electricity generation, distribution, and storage.
- **Copper is essential for the transition to Battery Electric Vehicles.**
- Supply and demand **determine the rate of electrification** which is the foundation of current climate policy.
- Many studies have raised concerns that **copper supply cannot meet the copper demand for** the green energy transition.
- Baseline worldwide growth will require 500,000 tonnes of Copper per year. Net zero worldwide growth will require 3 million tonnes o Copper per year. There are not sufficient projects in the development pipeline to support this kind of demand(1).
- **The Project will produce enough Copper to manufacture ≈ 2.8 million battery electrical vehicles over the life of mine.**



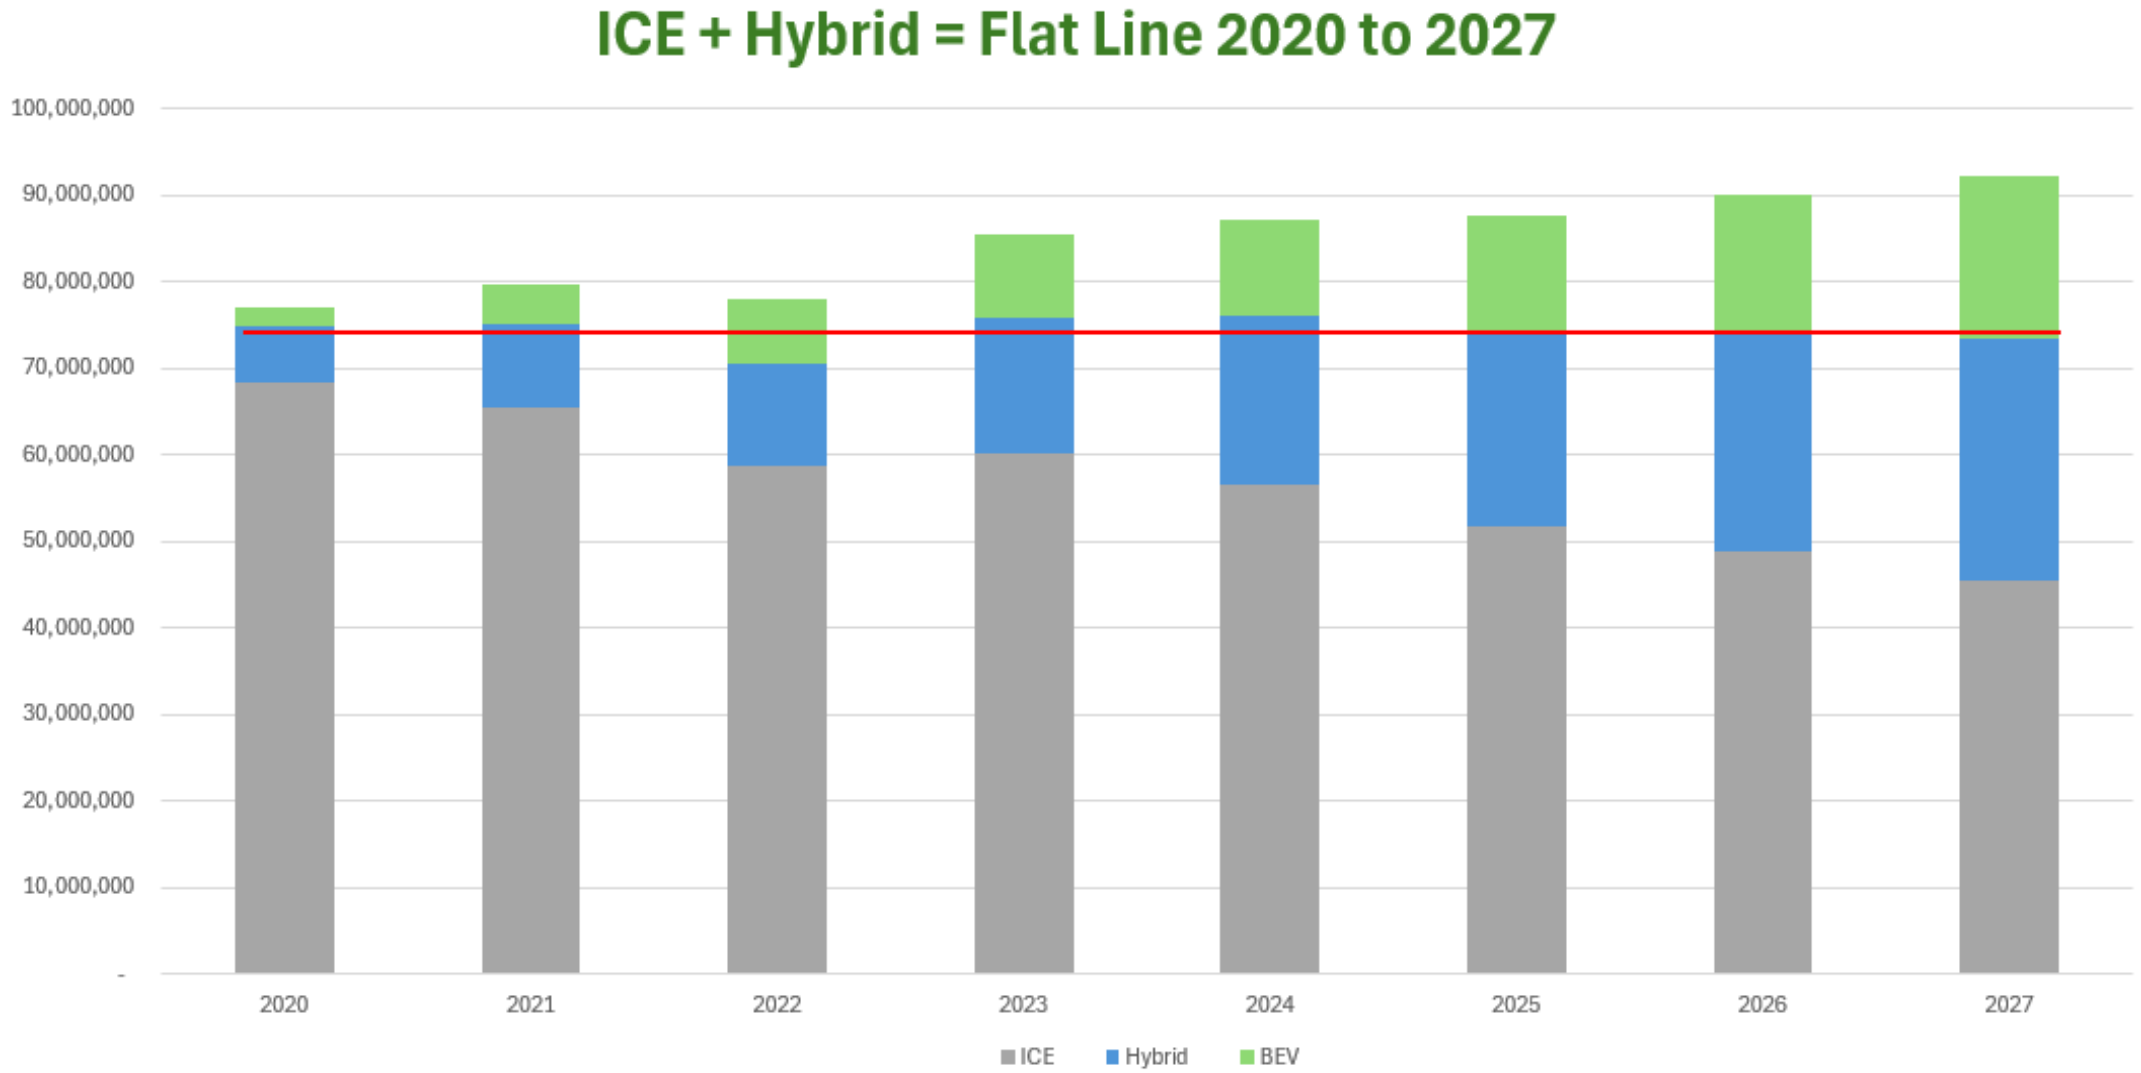
(1) International Energy Form, Copper Mining and vehicle Electrification, May 2024

WHY PALLADIUM IS
IMPORTANT FOR THE FUTURE



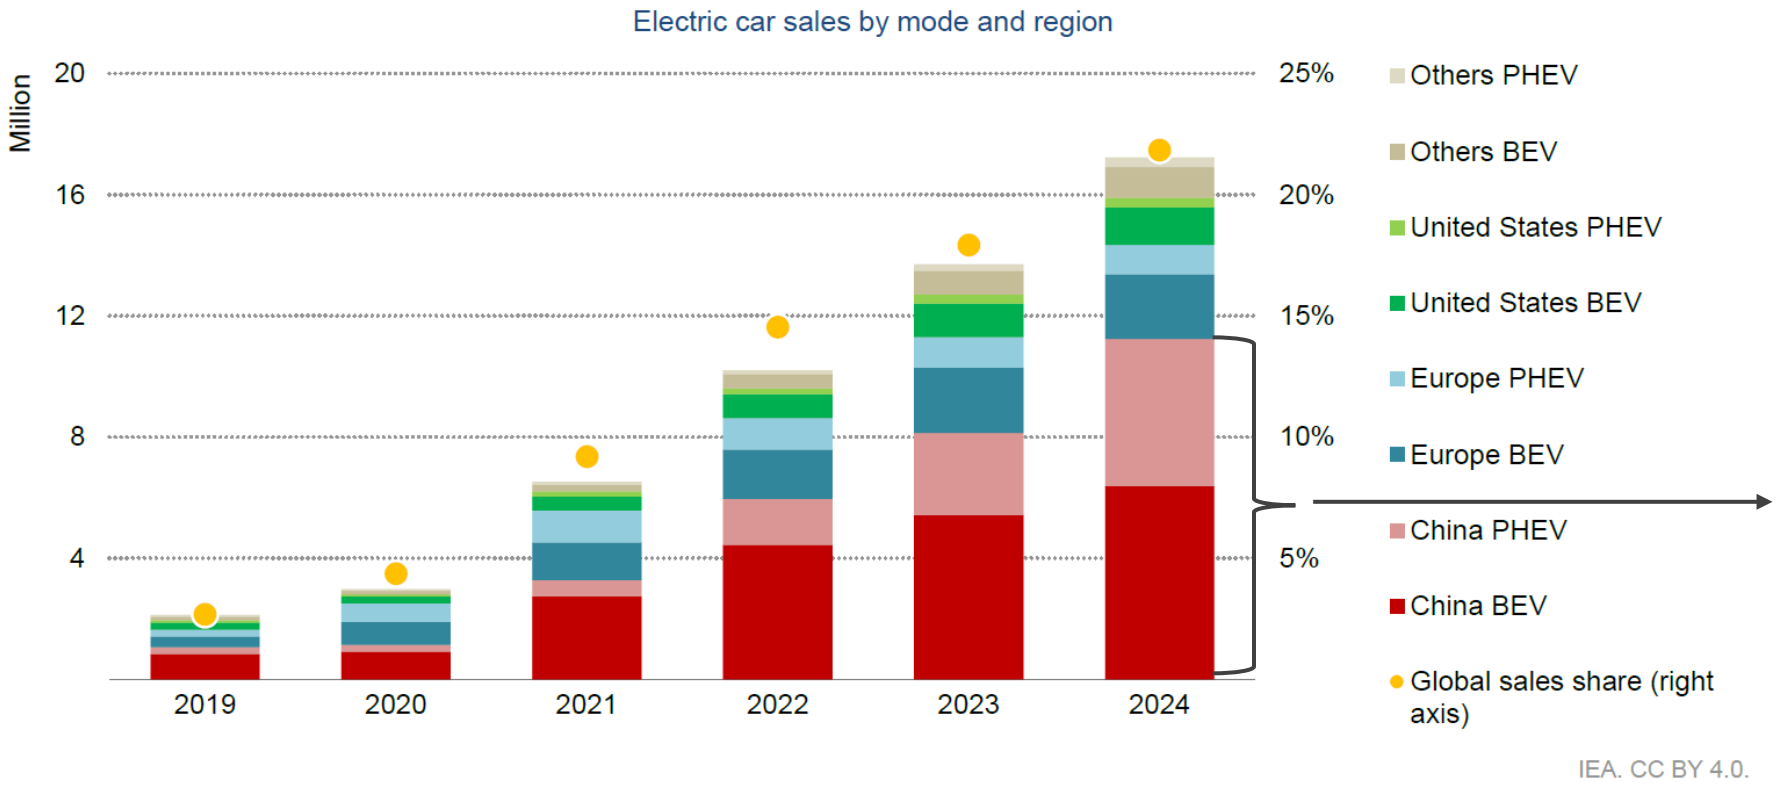
- Primary demand of platinum (Pd) is for **catalytic converters** of Internal Combustion Engines (ICE) which include **hybrid and plug-in hy**brid.
- Worldwide **adoption of Hybrid Electric Vehicles** is accelerating.
- Hybrid Electric Vehicles **use more palladium** than traditional internal combustion engines.
- **BYD** – largest battery electric vehicle manufacture in the world - >**50% of sales are hybrids**.
- Many worldwide **PGM producers are cash flow ne**gative at current palladium prices.
- Significant geopolitical risk:
  - **40% of mine supply comes from Russia** (the world's largest Pd producer is Nornickel as byproduct of Ni production)
  - **35% of mine supply comes from South Africa**
- **Consensus palladium price forecasts** do not reflect the changing landscape in the energy transition.
- **Consensus supply forecasts** have continuing deficits in the short term.

ICE (INTERNAL COMBUSTION ENGINE)
+ HYBRID - PALLADIUM DEMAND



HYBRID OUTPACING
BEV GROWTH IN CHINA

GENERATIONMINING
TSX:GENM OTCQB: GENMF



Notes: BEV = battery electric vehicle; PHEV = plug-in hybrid electric vehicle.
Source: IEA (2025), Global EV Outlook 2025.

- Hybrid growth is outpacing BEV growth in China - the worlds largest BEV market.
- Expect the same trend to follow in other world markets.

PALLADIUM PRICING VS
PRODUCTION COSTS

MARCH 2025 FEASIBILITY
STUDY UPDATE

Robust Base Case Economics:

- An after-tax NPV6% of $1.07 billion, IRR of 28%- and 1.9-year payback period based on the 3-year trailing average metal prices at the effective date

Strong critical mineral production during pre-production and the first three years of commercial operation:

- 151 Mlbs of payable copper, 720 koz of payable palladium and 156 koz of payable platinum

Initial Capital Costs:

- $992 million (CAD)

Attractive AISC:

- Life of mine (“LOM”) all-in sustaining costs (“AISC”) of US$2.05/CuEq lb or US$781/PdEq oz3

Average annual payable metals:

- 42 Mlbs. Copper, 168 koz Palladium, 38 koz Platinum, 12 koz Gold and 240 koz. Silver over 13 years.

MARCH 2025 FEASIBILITY
STUDY HIGHLIGHTS ($CAD)

GENERATIONMINING
TSX:GENM OTCQB: GENMF

After-Tax $NPV_{6\%}$	After-Tax IRR	Initial Capital[4]	Payback Period
$1.07 Billion	**28%**	**$992 Million**	**1.9 years**

LOM Payable	Average Annual Production	First 3 Years of Operations	AISC[2]
PdEq 4.11M oz **CuEq 1.57B lb**	**Pd 168 koz** **Cu 42 Mlbs**	**720 koz Pd** **151 Mlbs Cu**	**US$781/PdEq oz.** **US$2.05/CuEq lb.**

For additional information see "Technical Information"** on slide 2.*

NOTES:
*[1] Unless otherwise noted: Canadian $, economic analysis includes cash flow impacts of the WPM Stream. Feasibility Study metal prices assumptions – **US$1,525 oz Pd, US$4.00/lb Cu, US$950/oz Pt, US$2,000/oz Au, and US$24/oz Ag, FX USD1:CAD1.35.***
[2] For additional information on AISC and PdEq see news release entitled "Generation Mining Delivers Updated Feasibility Study for Canada's Next Critical Mineral Mine - the Marathon Palladium-Copper Project" dated March 31, 2023 and "non-IFRS Measures" in MD&A for the interim period ended March 31, 2024.
3 Copper Equivalent pounds (CuEq) uses the formula CuEq Mlbs. = PdEq koz. US$1800/oz./US3.70/lb./1,000*
4 Initial capital with equipment lease

FEASIBILITY STUDY

2025 FINANCIAL METRICS

GENERATIONMINING

TSX:GENM OTCQB: GENMF

Item	Units	2025 FS[(b)]	March 2025 long-term Consensus[(d)]
Cumulative After-Tax Cash Flow			
Up to end of Y3	$M	212	89
Up to end of Y5	$M	583	403
Economic Results [(a)(e)]			
Pre-Tax Cash Flow (undiscounted)	$M	3,009	2,576
Pre-Tax $NPV_{6\%}$	$M	1,660	1,375
Pre-Tax IRR	%	35.1%	30.6%
Pre-Tax Payback	years	1.7	1.8
After-Tax Cash Flow (undiscounted)	$M	2,032	1,744
After-Tax $NPV_{6\%}$	$M	1,070	876
After-Tax IRR	%	27.6%	23.8%
After-Tax Payback	years	1.9	2.2

Notes:

(a) The economic analysis was carried out in real terms (i.e., without inflation factors) in Q4 2024 Canadian dollars, assuming no project construction financing but inclusive of mining equipment leasing.

(b) Metal price assumptions are based on the adjusted 3-year historical trailing averages as of November 1, 2024 for each of the metals. The 3-year averages are as follows: Palladium - US$1,523/oz, Copper at U$4.02/lb, Platinum at US$964/oz, Gold at US$1,995/oz and Silver at US$24.02/oz.

(c) See Non-IFRS Financial Measures, below, for additional information on Pre-Tax and After-Tax Cash Flows.

MDMER	Environment Canada and Climate Change	**Complete**	**Received**

THE FINANCIAL ROAD MAP TO PRODUCTION

GENERATIONMINING

TSX:GENM OTCQB: GENMF

- Initial Capital Costs **$992** Million.[(a)]
- **Wheaton Precious Metals Stream**: early deposit of $40 million (received) and **$200M** construction payments for 100% gold and 22% platinum production.
- Mandate letter for banking syndicate of **Export Development Canada, ING Capital LLC and Societe Generale** to arrange a Senior Secured Project Finance Facility of up to **$540M**.
- Ongoing discussions for **$200M** of deeply subordinated debt.
- Formalizing an Off-Take Agreement
- Mining equipment leasing for initial fleet during Initial Capital period (construction and pre-production).
- Provincial/Federal Critical Metal Funding

(a) Initial Capital is a non-IFRS Measure. See Non-IFRS Measures, below, for additional information.

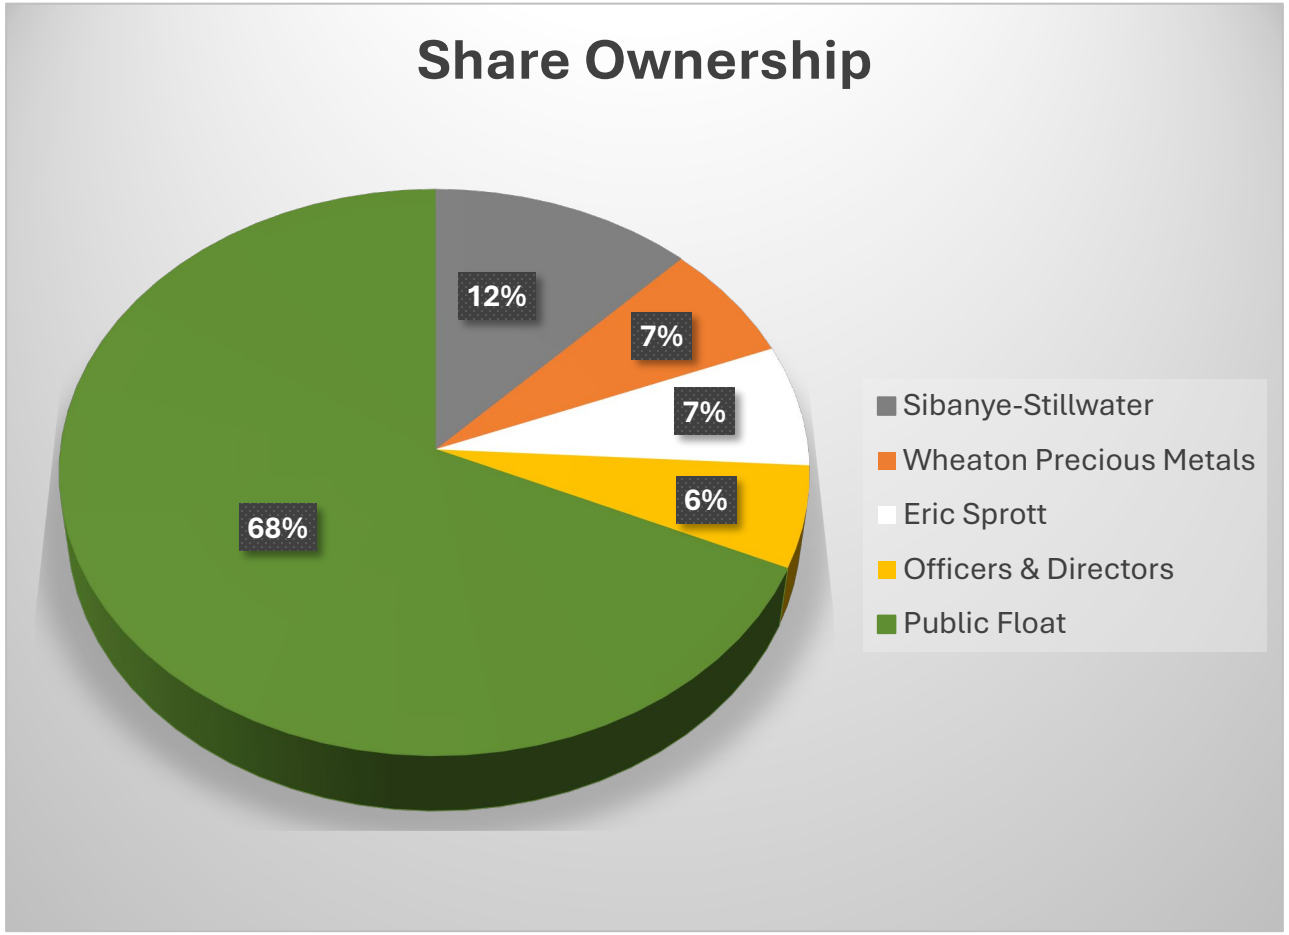
Analyst Coverage

Pierre Vaillancourt — Haywood Securities



MANAGEMENT TEAM

JAMIE LEVY
President, CEO & Director

Mr. Levy is President, Chief Executive Officer and a director of the Company. Prior thereto, Mr. Levy held the position of President and Chief Executive Officer of Pine Point Mining Limited ("Pine Point"), the predecessor to the Company, since 2013. Mr. Levy has approximately 22 years of experience and exposure in the exploration and mining industry.

BRIAN JENNINGS CPA, CA, B.Sc
Chief Financial Officer

Mr. Jennings is a Chartered Accountant and geologist with 30 years of experience working as a senior financial executive and corporate restructuring professional. He is currently the Chief Executive Officer of Veta Resources Inc. which is focused on gold exploration in Southern Chile. Mr. Jennings also spent nine years with Ernst & Young, where he was Vice-President Corporate Restructuring.

PAUL MURPHY Ing.
