

GENERATION MINING

MARATHON COPPER-PALLADIUM MINE

July 2026

This presentation contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively “forward-looking statements”). Forward-looking statements reflect current expectations or beliefs of Generation Mining Limited (the “Company”) regarding future events and the Company’s future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “continues”, “forecasts”, “projects”, “predicts”, “intends”, “anticipates”, “targets” or “believes”, or variations of, or the negatives of, such words and phrases or state that certain actions, events or results “may”, “could”, “would”, “should”, “might” or “will” be taken, occur or be achieved, including statements relating to the Company’s Technical Report (as defined below) and results therefrom, mineral resource and reserve estimates, the assembly of the Company’s project financing package and the proportion of that package that is committed or credit-approved, comprising the senior secured debt facility from Export Development Canada, ING Capital LLC and Société Générale, the metals streaming agreement with Wheaton Precious Metals, the equipment lease facilities, the Canada Infrastructure Bank subordinated debt facility and related subordinated standby cost overrun facility, the convertible note, the Canada Growth Fund committed equity, the additional equity financing the Company is seeking to arrange, and surety arrangements supporting closure bonds and letters of credit, together with the finalization and execution of definitive documentation for such financing and the satisfaction of related terms and conditions, the timing of a construction decision and the anticipated commencement of construction, proposed mine production plans, projected mining and process recovery rates (including mining dilution), estimates related to closure costs and requirements, anticipated supply and demand for, and the future prices of, copper, palladium and the other metals the Company intends to produce (including expected growth in copper and palladium demand and the effects of supply-demand imbalances) and other economic assumptions (including currency exchange rates), projected capital and operating costs and AISC, financial or economic analysis estimates (including cash flow forecasts, NPVs, IRRs and payback periods, including those presented on a spot-price basis), and mine life.

Although the Company believes that the expectations expressed in such statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the statements. There are certain factors that could cause actual results to differ materially from those in the forward-looking information. These include the risk that the committed or credit-approved facilities comprising the project financing package, including the senior secured debt facility, the metals streaming agreement, the equipment lease facilities, the Canada Infrastructure Bank subordinated debt facility and related subordinated standby cost overrun facility, the convertible note and the Canada Growth Fund committed equity may not be finalized and funded on the anticipated terms, including the risk that definitive documentation may not be executed on satisfactory terms or on a timely basis and that related terms and conditions, including the requirement for a fully funded construction package, may not be satisfied, the risk that the additional equity financing the Company is seeking to arrange may not be obtained on acceptable terms or at all, potential dilution to shareholders resulting from the equity financing and conversion of the convertible note, the risk that the Company may be unable to put in place surety arrangements supporting closure bonds and letters of credit on satisfactory terms, the risk that a construction decision may be delayed or may not be made within the anticipated timeframe, the risk of cost overruns during construction and the sufficiency of that standby facility to fund them, the risk that anticipated growth in copper and palladium demand and other market assumptions may not materialize, the risk that economic estimates presented on a spot-price basis are illustrative only, assume current metal prices persist and are not forecasts of future results; commodity price volatility, uncertainties involved in interpreting geological data, increases in costs, environmental compliance and changes in environmental legislation and regulation, the Company’s relationships with First Nations communities, exploration successes, and general economic, market or business conditions, as well as those risk factors set out in the Company’s annual information form, the Technical Report and in the continuous disclosure documents filed by the Company on SEDAR at www.sedarplus.ca. Readers are cautioned that the foregoing list of factors is not exhaustive of the factors that may affect forward-looking statements. Accordingly, readers should not place undue reliance on forward-looking statements. The forward-looking statements in this presentation speak only as of the date of this presentation or as of the date or dates specified in such statements.

Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking information. For more information on the Company, investors are encouraged to review the Company’s public filings on SEDAR at www.sedarplus.ca. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.

Technical Information

The scientific and technical information contained in this presentation was reviewed and approved by Daniel Janusauskas, P.Eng, Technical Services Manager of Generation PGM Inc., a wholly owned subsidiary of the Company, and a Qualified Person as defined by Canadian Securities Administrators’ National Instrument 43-101 - Standards of Disclosure for Mineral Projects. For further information, see the Technical Report entitled “Marathon Copper-Palladium Project - Feasibility Study Report Update”, dated March 28, 2025, with an effective date of November 1, 2024, and filed under the Company’s profile on www.sedarplus.ca or on the Company’s website at <https://genmining.com/projects/feasibility-study/> (the “**Technical Report**”).

EXCELLENT LOCATION AND JURISDICTION

- Located on **Trans-Canada Highway**
- Served by **CPR main rail line**
- Main Marathon deposit is 10 km from **Town of Marathon** (~3,000 pop.)
- **New 230kV power line** from Wawa to Thunder Bay crosses property
- 276 Bed Construction Camp (Option to own) in the Town
- Numerous towns, Indigenous communities **nearby** available for the **core** workforce
- Commercial airport next to the Marathon Deposit
- Access to the Port of Marathon, which recently received \$2 million from the province to revitalize the port

GENERATION MINING

TSX:GENM OTCQB: GENMF

GLOBAL COPPER DEMAND BY SECTOR

Rising energy transition, digitalization and defense needs are driving incremental copper demand.

Million metric tons copper (MMt Cu)

1. Includes copper demand from construction, cooling, appliances, fossil power generation, machinery and internal combustion engine (ICE) vehicles.
2. Includes copper demand from clean energy technologies, transmission and distribution (T&D) and EVs.

Source: S&P Global
© 2026 S&P Global

COPPER DEMAND GROWING AT 3.5% PER YEAR

THE COPPER SUPPLY GAP IS GROWING

Without meaningful expansion, the primary mined supply is set to peak in 2030

Note: Recycled (secondary supply) represents end-of-life scrap. Mined supply includes operating production and risked production from committed, probable and possible projects. Mined supply represents 66% of total supply (primary + secondary).

Copper Discoveries and Exploration Budgets (1990–2024)

Total Volume in Millions of Tonnes of Copper Discovery by Period

1990–99	2000–09	2010–19	2020–24
705.3	487.1	163.3	8.8
116 discoveries	101 discoveries	35 discoveries	6 discoveries

Major Copper Deposit Discoveries by Region (1990–2024)

 Latin America	41 discoveries
 Africa	24 discoveries
 Eurasia	23 discoveries
 Australia	19 discoveries
 North America	15 discoveries

WHY PALLADIUM IS IMPORTANT FOR THE FUTURE

- Primary demand of platinum (Pd) is for **catalytic converters**.
- Worldwide **adoption of Hybrid Electric Vehicles** is accelerating.
- Hybrid Electric Vehicles **use more palladium** than traditional ICE vehicles
- **BYD** – largest battery electric vehicle manufacture in the world - **>50% of sales are hybrids**.
- High platinum prices accelerating return to palladium in autocatalysts -- 1M oz potential
- Hybrid sales double that of EVs in the U.S., 30 times that in Japan (world's number two and three auto markets)
- Significant geopolitical risk: 40% of mine supply comes from Russia, 35% from South Africa
- Production rates in Russia and South Africa both predicted to decline significantly this year

MANAGEMENT TEAM

GENERATION MINING

TSX:GENM OTCQB: GENMF

JAMIE LEVY

President, CEO & Director

Mr. Levy is a co-founder of the Company and serves as President and Chief Executive Officer and is a director of the Company. Mr. Levy was President and CEO of Pine Point Mining, the predecessor to the Company, from 2013-18. Mr. Levy has approximately 22 years of experience in mining finance.

BRIAN JENNINGS CPA, CA, B.Sc

Chief Financial Officer

Mr. Jennings is a Chartered Accountant and geologist with 30 years of experience as a senior financial executive and corporate restructuring specialist. He currently serves as Chief Financial Officer of the Company and Chairman of the Audit Committee of PMET Resources Inc., which is advancing a lithium project in Quebec.

ANTON CUKROV, CA

VP Finance

Mr. Cukrov brings 18 years of finance experience in the mining sector, with expertise spanning the full lifecycle of mining operations, from project development, construction, and ongoing operations including Foran's (now Eldorado's) McIlvenna Bay mine and Centerra.

RUBEN WALLIN P.Eng

VP Sustainability

Mr. Wallin has management experience in the areas of environment, permitting, Indigenous and community relations and government relations. Previously held positions at Placer Dome, De Beers Canada, Barrick and Osisko Gold. Formerly Vice President Environment and Sustainability for Detour Gold.

JEREMY WYETH, B.A.Sc. Mining Engineer

Chief Operating Officer

Mr. Wyeth brings to the Company four decades of international experience in operations, project development, and executive leadership. Earlier in his career, Mr. Wyeth led the full development cycle of De Beers' \$1 billion Victor Diamond Mine in Northern Ontario, from prefeasibility through construction and commissioning, ahead of schedule and under budget.

CLINTON SWEMMER P.Eng PrEng (rsa) PMP MSAICE

VP Projects

Mr. Swemmer is a seasoned project leader with more than 25 years of experience in mining. He has led several multibillion-dollar developments, including construction, and operations on projects such as Artemis's Blackwater, Kinross's Round Mountain and Bald Mountain, Norilsk's project in Botswana. He has also held senior positions at engineering firms Ausenco, DRA, and Wood.

RACHAEL PINEAULT

EVP Corporate Affairs and Human Resources

Ms. Pineault has over 30 years of experience in Human Resources, Governance, and Sustainability within the mining industry. She has held senior roles at a number of mining companies, including Detour Gold, Kirkland Lake Gold, De Beers Canada and NexGold Mining.

ERICH MEINTJES, P.Eng

VP Engineering

Mr. Meintjes is a mechanical engineer with an MBA who has been building mines worldwide for 27+ years. Former Senior VP at DRA Global, he has served as Senior Project Manager at major mines from design to commissioning, including mines owned by Glencore/Xstrata, Anglo Platinum, Impala Platinum, and Lonmin.

BOARD OF DIRECTORS / TECHNICAL ADVISORS

GENERATION MINING

TSX:GENM OTCQB: GENMF

KERRY KNOLL

Chairman of the Board

Mr. Knoll was a co-founder of Generation Mining and co-founded several mining companies over the past four decades, including successful heap leach miner Wheaton River (which was also the parent of Wheaton Precious Metals), Thompson Creek, which became one of the world's largest primary molybdenum miners, and Glencairn Gold, which had three operating gold mines in Central America.

KYLE KUNTZ MBA

Director

Mr. Kuntz is an experienced mining executive with over ten years leading major North American projects. He is VP, Projects at Equinox Gold, where he directs project development, having previously managed the Valentine Gold Project at Marathon Gold and Calibre Mining. He has held key positions at JDS Energy & Mining, Nuna Group, and Stantec, and is skilled in moving projects from feasibility to construction, focusing on management, engineering, procurement, and execution.

PHILLIP C. WALFORD P.Geo, P.Eng

Director

Mr. Walford held the position of President and Chief Executive Officer of Marathon Gold Corporation from November 2010 to August 2019. Previously, he was a founder and President of Marathon PGM Corporation, at the time when that company owned Generation Mining's Marathon Palladium-Copper Project. He guided Marathon PGM through advanced exploration until it was taken over by Stillwater Mining Company in 2010 for US\$118 million.

PAUL MCRAE, B.A.Sc. Mining Engineer

Technical Advisor

Mr. McRae brings more than 40 years of technical, engineering, and construction management experience. He has delivered major mining projects on time and on budget across North America, Europe and Australia, including leadership roles on De Beers' Victor Mine and Lundin Mining's Eagle Mine.

JAMIE LEVY

President, CEO and Director

Mr. Levy is a co-founder of the Company and serves as President and Chief Executive Officer and is a director of the Company. Mr. Levy was President and CEO of Pine Point Mining, the predecessor to the Company, from 2013-18. Mr. Levy has approximately 22 years of experience in mining finance.

STEPHEN REFORD BA.Sc, P.Eng

Director

Mr. Reford was a director of Pine Point, the predecessor to the Company, since June 26, 2011. Mr. Reford is Senior Geophysicist & Head of Smart Geophysical Interpretation at Xcalibur Smart Mapping, and was formerly the President of Paterson, Grant & Watson Limited, a geophysical consulting company, from 2016 to 2025.

REBECCA HUDSON CPA, CA, M.ACC

Director

Ms. Hudson is a Chartered Professional Accountant with over 25 years' experience in accounting and financial reporting, corporate finance, risk management, financial audit and corporate governance for several companies including Signature Resources Ltd., Energy Plug Technologies Corp., and currently serves as the CFO of Restart Life Sciences Corp., and a private drilling company, Andean Drilling Services Inc.

See the accompanying notes on the subsequent slide

MINERAL RESOURCES AND RESERVES NOTES

Mineral Reserves Notes:

- a. The Mineral Reserves Estimate were prepared by Marc Schulte, P.Eng., who is also an independent Qualified Person, reported using the 2014 CIM Definition Standards, and have an effective date of November 1, 2024.
- b. Mineral Reserves are a subset of the Measured and Indicated Mineral Resources Estimate that has an effective date of November 1, 2024. Inferred Class Resources are treated as waste.
- c. Mineral Reserves are based on the Updated Marathon Project Feasibility Study mine plan.
- d. Mineral Reserves are mined tonnes and grade, the reference point is the process plant feed at the primary crusher. Process plant feed tonnes and grade include consideration of mining operational dilution and recovery.
- e. Mineral Reserves are reported at a cut-off grade of \$16/t NSR and based on the following inputs:
 1. Effective metal prices of pit shell used for ultimate pit designs of US\$1,144/oz Pd, US\$3.0/lb Cu, US\$713/oz Pt, US\$1500/oz Au and US\$18/oz Ag (Based on revenue factor 0.75), and an exchange rate of 1.35 C\$:1.00 US\$.
 2. NSR cut-off assumes Pd Price of US\$1,525/oz, Cu price of US\$4.00/lb, Pt Price of US\$950/oz, Au price of US\$2,000/oz, Ag price of US\$24/oz, at an exchange rate of 0.74 US dollar per 1.00 Canadian dollar.
 3. Payable %'s of 95% for Pd, 96.5% for Cu, 93% for Pt, 93.5% for Au, 93.5% for Ag;
 4. Refining charges of US\$24.5/oz for Pd, US\$0.079/lb for Cu, US\$24.5/oz for Pt, US\$0.50/oz for Ag;
 5. Minimum deductions of 2.875 g/t for Pd, 1.1% for Cu, 2.875 g/t for Pt, 1.0 g/t for Au, 30.0 g/t for Ag;
 6. Treatment charges of US\$79/t and transport and offsite costs of US\$125/t concentrates, concentrate ratio of 90.9%;
 7. Metallurgical recoveries of 89.5% for Pd, 94.0% for Cu, 84.0% for Pt, 83.1% for Au, 68.0% for Ag
- f. The cut-off grade covers processing costs of \$8.27/t, general and administrative (G&A) costs of \$2.63/t, sustaining and closure costs of \$3.13/t, ore mining differential costs of \$0.57/t, and stockpile rehandle costs of \$1.40/t.
- g. Numbers have been rounded, which may result in summation differences. Canadian Institute of Mining, Metallurgy and Petroleum (CIM) Definition Standards for Mineral Resources and Mineral Reserves (CIM (2014) definitions) were used for Mineral Reserve classification.

Mineral Resources Notes:

- a. Mineral Resources were estimated using the Canadian Institute of Mining, Metallurgy and Petroleum (CIM), CIM Standards on Mineral Resources and Reserves, Definitions (2014) and Best Practices Guidelines (2019) prepared by the CIM Standing Committee on Reserve Definitions and adopted by CIM Council.
- b. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, marketing, or other relevant issues. Mineral Resources are reported inclusive of Mineral Reserves.
- c. The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.
- d. The Marathon Mineral Resource is reported within a constrained pit shell at a NSR cut-off value of \$13.6/t.
- e. $\text{Marathon NSR (\$/t)} = (\text{Cu \%} \times 111.49) + (\text{Ag g/t} \times 0.73) + (\text{Au g/t} \times 80.18) + (\text{Pd g/t} \times 56.02) + (\text{Pt g/t} \times 36.49) - 2.66$
- f. The Marathon Mineral Resource Estimate was based on metal prices of US\$1,550/oz Pd, US\$4.250/lb Cu, US\$1,100/oz Pt, US\$2,300/oz Au and US\$27/oz Ag, and a C\$:US\$ exchange rate of C\$1.35 to US\$1.00.
- g. The Sally and Geordie mineral resources are reported within a constraining pit shell at a NSR cut-off value of \$13/t.
- h. $\text{Sally and Geordie NSR (\$/t)} = (\text{Ag g/t} \times 0.48) + (\text{Au g/t} \times 42.14) + (\text{Cu \%} \times 73.27) + (\text{Pd g/t} \times 50.50) + (\text{Pt g/t} \times 25.07) - 2.62$
- i. The Sally and Geordie Mineral Resource Estimate was based on metal prices of US\$1,600/oz Pd, US\$3.00/lb Cu, US\$900/oz Pt, US\$1,500/oz Au and US\$18/oz Ag, and a C\$:US\$ exchange rate of 1.30 C\$ to 1.00 US\$.
- j. Numbers have been rounded, which may result in summation differences.

CAPEX AND OPEX

Capital Area	2025 FS (\$M)
Mobile Equipment for Construction ^(a)	74
Processing Plant	280
Infrastructure	88
TSF, Water Management and Earthworks	97
EPCM, General and Owners Cost	198
Preproduction, Startup, Commissioning	169
Contingency	87
Initial Capital^(b)	992
Preproduction revenue ^(b)	(184)
Total	809
Sustaining Capital	565
Closure and Reclamation Costs	72

Notes:

^(a) Mobile equipment acquired for Construction is presented as the cost of equipment deposits and lease payments during the construction and pre-production period. The remainder of the equipment leasing costs are incurred during operations and included in sustaining capital.

^(b) See Non-IFRS Financial Measures, below, for additional information on Initial Capital and Preproduction Revenue

Description	Units	Operating Cost
Mining ^(a)	\$/t processed	12.93
Processing	\$/t processed	8.57
General & Administration	\$/t processed	2.62
Concentrate Transport Costs	\$/t processed	1.96
Treatment & Refining Charges	\$/t processed	2.38
Royalties	\$/t processed	0.10
Total Operating Costs	\$/t processed	28.56
Average Operating Cost	US\$/oz PdEq ^(c)	663
Average All-in Sustaining Cost^(b)	US\$/oz PdEq^(c)	781
Average Operating Cost	US\$/lb CuEq ^(c)	1.74
Average All-in Sustaining Cost^(b)	US\$/lb CuEq^(c)	2.05

Notes:

^(a) Mining cost per tonne mined is C\$3.49/t.

^(b) All-in sustaining cost excludes the impact of the Wheaton PMPA.

^(c) See Non-IFRS Financial Measures, below, for additional information on Operating Costs, AISC, PdEq and CuEq.

Conventional processing plant flow sheet consisting of:

- Primary gyratory crusher
- Overland conveyor and crushed ore stockpile
- SAG-Ball Mills and Pebble crusher
- Regrind mill
- Rougher + cleaner flotation circuit
- Concentrate and tailings dewatering
- Concentrate storage
- Will produce a copper-PGM concentrate; low in deleterious elements
- Copper flotation kinetics very rapid; PGMs flotation slower than Cu but predictable

MET RECOVERIES AND CONCENTRATE GRADE

Parameter	GeoMet Formula ¹	Maximum Value
%Rec Cu to Final Conc	$= 97.55 \times (\% \text{ Cu head grade})^{0.0239}$	94% Rec Cu
%Rec Pd to Final Conc	$= 89.14 \times (\text{g/t Pd head grade})^{0.0203}$	90% Rec Pd
%Rec Pt to Final Conc	$= 104.51 \times (\text{g/t Pt head grade})^{0.2034}$	84% Rec Pt
%Rec Au to Final Conc	$= 116.51 \times (\text{g/t Au head grade})^{0.1822}$	86% Rec Au
%Rec Ag to Final Conc	$= 50.82 \times (\text{g/t Ag head grade})^{0.6090}$	68% Rec Ag
%Mass Pull to Final Conc	$= 0.625 \times e^{(2.899 \times \% \text{Cu head grade})}$	2.0% Mass Pull

Elements in the Concentrate ²		Bulk Sample used in Met Phase II
Pd	g/t	85.9
Cu	%	20.7
Pt	g/t	22
Au	g/t	9.84
Ag	g/t	74
Rh	g/t	1.54
Fe	%	22.8
Ni	%	0.33
As	%	0.013
S	%	20.9
Si	%	8.29
Hg	g/t	not detected
Mg	%	3.79

Notes:

¹ Metallurgical recovery equations developed through test programs and based on a GeoMet model; the GeoMet model considers a best fit recovery equation for each metal based on locked cycle test data to final concentrate considering statistical analysis for a given mass pull.

² Samples blended by SGS from concentrate produced from Phase II Metallurgical testing (2021).
